DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 14-20, drawn to a computer implemented system or method for writing an insurance policy or processing an insurance claim, classified in class 705, subclass 4.
 - II. Claims 11-13, drawn to a system or method for processing of market data in order to predict future demand of a product or service, classified in class 705, subclass 10.
 - III. Claims 21-33, drawn to a computerized arrangement for the systematic and scientific analysis and evaluation of a the operation of an organization or the programmed scheduling of an organization., classified in class 705, subclass 7.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for risk classification of a prospective insured by accessing data regarding one or more personality traits of the prospective insured to develop personality trait data and classifying the prospective insured into one of a plurality of risk

groups based on the personality trait data of the prospective insured. Invention II has separate utility such as a method of devising a questionnaire including collecting data from a plurality of survey respondents, said data including an indication of a number of claims reported by each of the survey respondents and a plurality of personality traits for said each of the survey respondents, correlating sets of the personality traits with the number of claims, and selecting one or more traits among the set of personality traits based on a correlation with the number of claims. Invention III has separate utility such as a method for applying an anti-faking technique to the item answers to determine a reliability factor the personality trait data. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3626

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
